Re: Disposal of Demolition Materials - Victoria Hotel Redevelopment

Dear Chris,

As you are aware the Yindjibarndi Aboriginal Corporation (YAC) along with funding partners the Federal Department of Infrastructure and Pilbara Development Commission are undertaking the redevelopment of the Victoria Hotel.

In refurbishing the hotel, a substantial cost to the project will be dumping of redundant building materials, including asbestos.

In order to stretch the available finances of the project and deliver the biggest 'bang for buck' in turn for the community, YAC would appreciate the opportunity to discuss potential compensations, or reductions in costs (i.e. Local Government Fees and Charges) for the disposal of waste materials. Any in-kind support would be recognized in an agreed form with the City (i.e. signage, project updates, media releases etc.).

Any cost reduction or saving able would be received by the project rather than individual contractors. Any possible reduction of cost for particular waste materials would be made clear in the tender documents ensuring this, reducing the cost to which individual contractors would be required to pass on and apply a markup to.

Our ongoing thanks to the City of Karratha for their support in delivering this cornerstone project for Roebourne. We look forward to receiving a response. Please correspond with Rob Gordon on 0417 634 361 or rob@rffaustralia.com as our client representative.

Yours faithfully,

Michael Woodley
