Ron van Welie
Operations Coordinator
City of Karratha
Welcome Road
KARRATHA WA 6714

Dear Ron

Thank you for your email dated 11 November 2015 regarding the causeway within Johns Creek Boat Harbour and the recommendations made by the City of Karratha:

- 1. DEMOLISH the pathway located on the Johns Creek breakwater / causeway, leaving crushed concrete materials on site**
- 2. REMOVE the tables and shelter located at the end of the pathway and remove all signage.**
- 3. EXCISE the provision of the pathway from the lease between the Department of Transport and Shire of Roebourne.**
- 4. CONSIDER a budget amendment in the March budget review to carry out 1 above.**

The Department advises that it is not appropriate that the crushed materials remain on site. The City of Karratha is required to remove the concrete footpath and all associated infrastructure and signage, including any crushed concrete from the causeway and bund wall with the minimal removal of the parent rock.

It is recognised that the future maintenance of the causeway will be the Department's responsibility and once works have been completed to the satisfaction of the Department the lease between the Department and the City of Karratha can be amended to reflect the changes.

If you have any queries or require further information please contact Vicky Shilvock on 9435 7676.

Yours sincerely

Shelley Grice
Manager, Facility Operations
