### Interpreting zoning table

(1) The permissibility of uses of land in the various zones in the Scheme is determined by cross-reference between the list of use classes on the left hand side of the zoning table and the list of zones at the top of the zoning table.

(2) The symbols used in the zoning table have the following meanings –

- P means that the use is permitted if it complies with any relevant development standards and requirements of this Scheme
- I means that the use is permitted if it is consequent on, or naturally attaching, appertaining or relating to the predominant use of the land and it complies with any relevant development standards and requirements of the Scheme
- D means that the use is not permitted unless the local government has exercised its discretion by granting development approval
- A means that the use is not permitted unless the local government has exercised its discretion by granting development approval after advertising the application in accordance with clause 64 of the deemed provisions
- X means that the use is not permitted by the Scheme.
